

An Awesome God

The Nature of Man

Lesson 2

The study of the nature of God includes a discussion of misconceptions about that nature and a look at the attributes of God.

What Everyone Should Know

Christians learn in Sunday School and church about God and what He is like. The Bible gives a lot of specific information about Him. But what can a person know of God without the Bible.

Look up Psalm 19:1.

What tell us of the "glory of God"? _____

Now look up Romans 1:18-20.

What two attributes of God are clearly seen just by looking at God's creation?

A. _____ B. _____

There is another way to know of God. That is through the "built-in" indicator given to each man. That indicator is a man's conscience. His conscience is his general sense of right and wrong.

In summary, not including the Bible, what are two ways man has to know there is a God?

A. _____ B. _____

What does God say about those who ignore these? Read Romans 1:21-22.

What are those who ignore God and claim to be wise? _____

A Little Knowledge Is a Dangerous Thing

Even though man can know there is a God without the Bible, the belief system that arises when relying on natural knowledge and conscience alone can end up much different from Christianity.

Before entering a discussion of the erroneous belief systems man has stumbled into over

the years, a short lesson in Greek prefixes is appropriate.

Complete the definitions by choosing from the list at the right.
